### Commercial Boats

#### SG 12' 4", 14, and 15' 6"

These "top-of-the-line" models continue to set the standard for inflatable sport-boats. Built for high performance with deep "V" trigon air keels, Achilles SG boats offer a roomy, square bow configuration which provides room for extra gear, and an aluminum floor system which delivers superior traction, rigidity and durability. Achilles SG Sportboats bring performance and practicality together!

#### SU 14, 16, and 18'

SU Boats are built tough to work hard for rugged private and commercial use. They are made with an additional heavy-duty layer of 840-denier nylon fabric in a two-ply technique which results in a core fabric even stronger than a single base fabric of equal thickness. A number of exclusive features such as recessed valves are built into these boats which combine to bring the advantages of an inflatable to the demands of tough commercial marine use.

### Emergency Rescue Boats

#### The FRB 104 and 124

are designed to enable fire departments and emergency rescue units to keep an easily stored boat available that can be ready in minutes to respond to a water emergency. Weighing just 101#'s and 141#'s respectively, they are easy to carry, and can hold 4 - 6 persons.

Inflation in minutes with a simple foot or in seconds with a compressed air bottle adaptor kit.
